

Forecasting Commercial Gentrification

**Charlie Wiebe, Landon Waters,
Peyton Swan, Hriday Raj**

What is Gentrification?

- Gentrification occurs when an area undergoes rapid economic change, leading to:
 - Rising rents & property values
 - Displacement of existing communities & businesses
 - Shift toward high-income tenants & luxury developments

The Problem of Gentrification

- Displacement: small businesses priced out
- Homogenization: loss of local character/culture
- Economic volatility: boom and bust cycles

Savills' role:

- Prevent overconcentration in “trendy” submarkets
- Encourage balanced, healthy development
- Identify early signals before full gentrification occurs

Our Predictive Modeling-Based Solution

Modeling the likelihood of a submarket becoming gentrified (the gap in rent between A-class and O-class spaces increasing by >10%)

- Why economic stratification is used as indicator of gentrification:
 - Landlords are pressured to withhold O-class spaces to redevelop or upgrade to A-class
 - Premium growth attracts investors/developers
 - Creates a self-reinforcing cycle

Model Output:

- Probability score (0–1) for submarket transition risk
- "Likely" vs. "Unlikely" classification

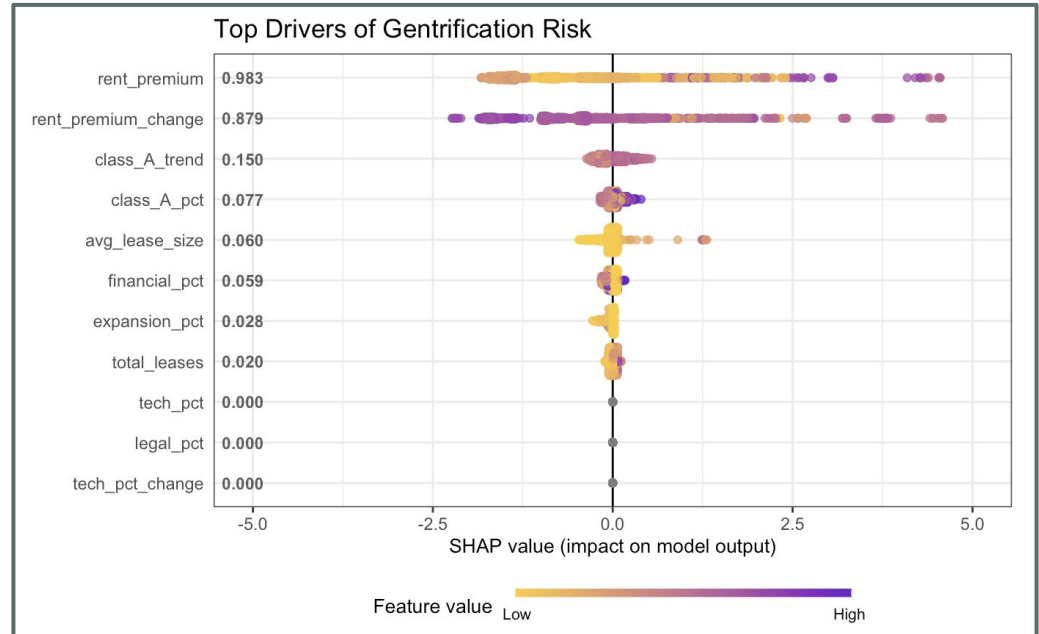

Model Performance

Accuracy:

- Logistic Regression: 0.962
- XGBoost: 0.991

Area Under Curve (AUC) scores:

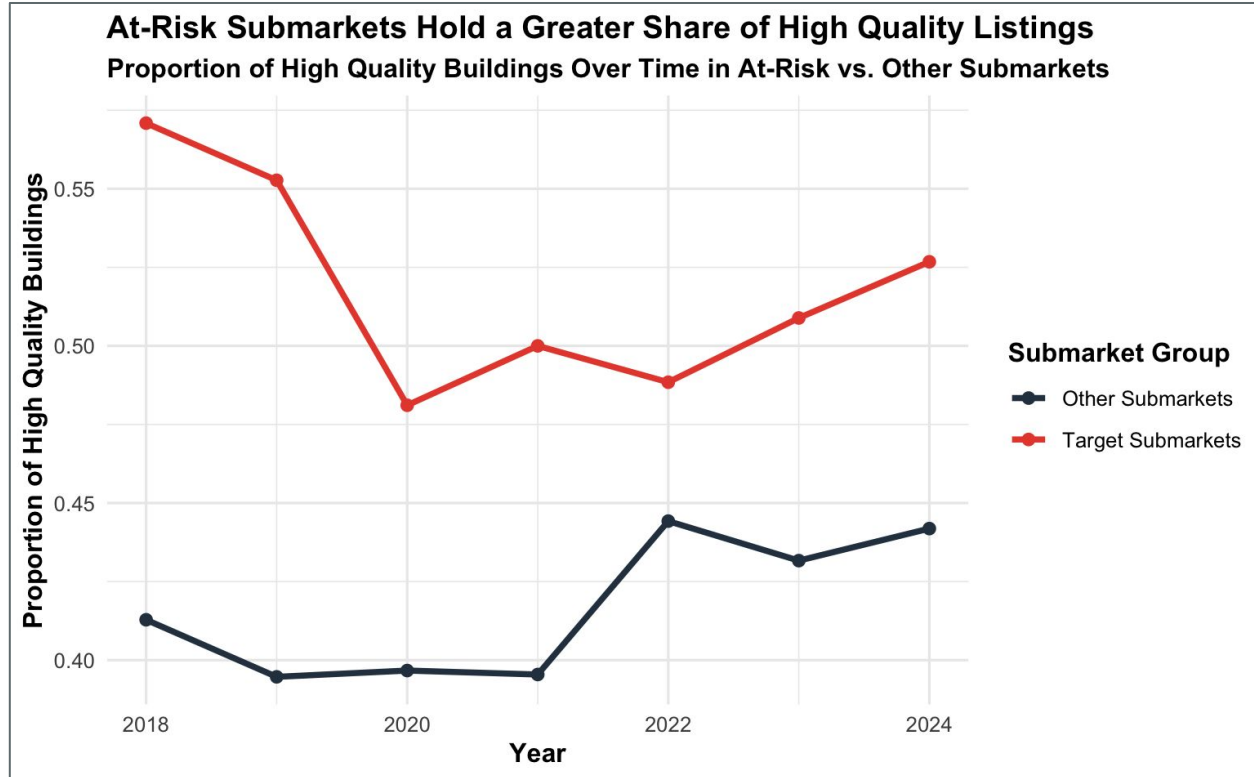

- Logistic Regression: 0.831
- XGBoost: 0.984

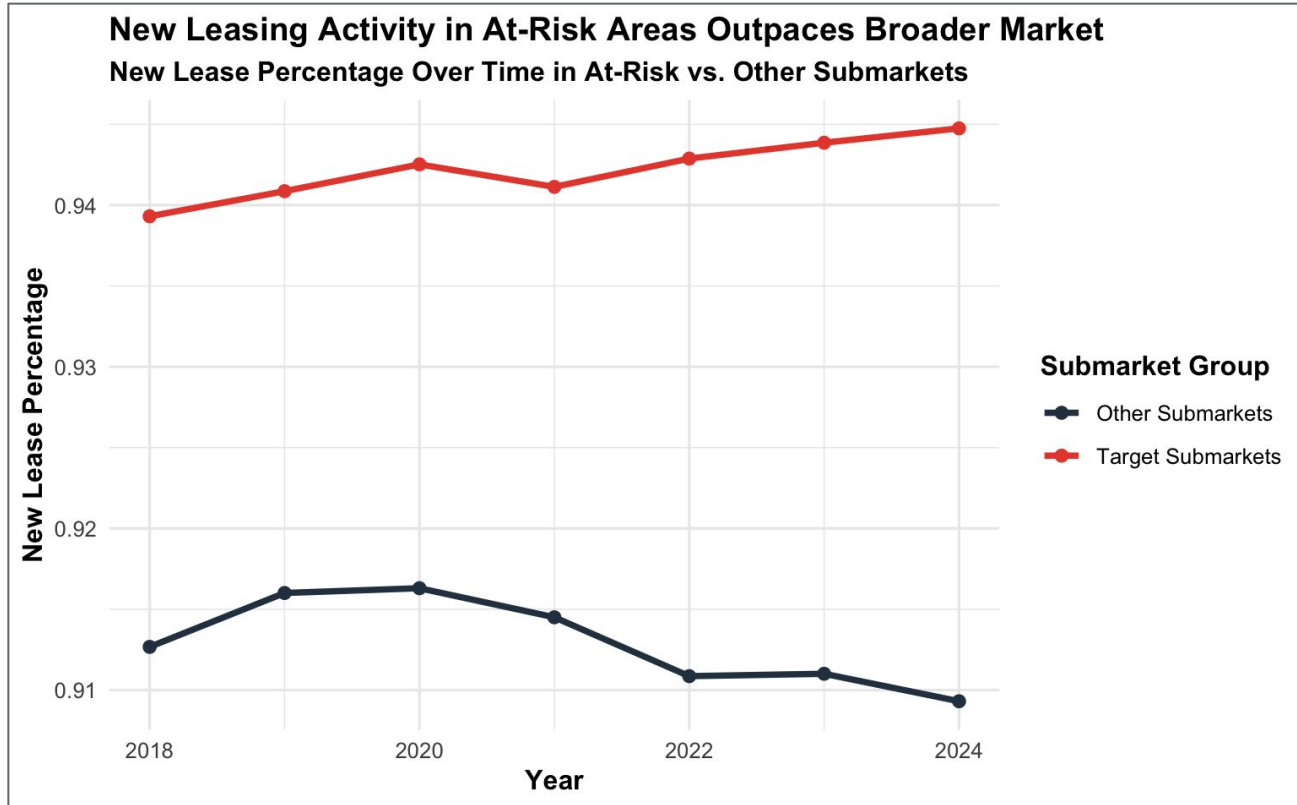

Current High-Risk Submarkets

market <chr>	internal_submarket <chr>	transition_prob <dbl>
Boston	Route 128 South	0.7290439
Boston	Cambridge	0.7259895
Boston	Seaport/South Boston	0.7259895
Boston	Route 128 North	0.7083487
Boston	Back Bay	0.6979645

How Savills Can Use This Tool

- Early warning system: flag at-risk submarkets
- Client advisory: steer clients away from over-priced areas
- Policy advocacy: work with cities to incentivize balanced growth

Example workflow:

- Run quarterly predictions
- Generate reports for brokers
- Highlight alternatives in “emerging but stable” areas

Conclusion

- Gentrification harms long-term stability
- Our model identifies risk before prices spike
- Savills can lead in **ethical** real estate advisory
